

# Tree Root Protection & Salt Break Product Information

## Abweb TRP GW150/250 & GW200/300

Used to protect tree roots from occasional trafficking during construction works. Prevents compaction of the ground restricting oxygen supply to the roots.

| Abweb TRP<br>GW150/250 & GW200 / 300 | Format | Dimensions | Priced in |
|--------------------------------------|--------|------------|-----------|
|                                      | Panels | 4m x 6m    | sq m      |

## Rootline GHDR Smooth

Installed horizontally to protect the waterproof membrane from tree root damage on green roofs. It is used vertically around planters to stop tree roots growing out into footpaths and road pavements.

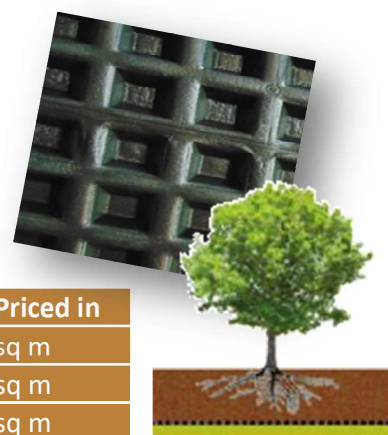

| Rootline<br>GHDR | Format  | Dimensions        | Weight    | Priced in |
|------------------|---------|-------------------|-----------|-----------|
|                  | GHD85R  | 1.2m x 10m or 50m | 850 gsm   | sq m      |
|                  | GHD120R | 1.2m x 10m or 50m | 1,200 gsm | sq m      |
|                  | GHD200R | 1.2m x 10m or 30m | 2,000 gsm | sq m      |

## Rootline GHD100S3

Cusped Rootline with ribbed profile, used vertically in planters or horizontally over contaminated / brownfield land.

| Rootline<br>GHD100S3 | Format       | Dimensions   | Weight    | Priced in |
|----------------------|--------------|--------------|-----------|-----------|
|                      | Dimpled Roll | 550mm x 120m | 1,000 gsm | sq m      |
|                      | Dimpled Roll | 1.1m x 140m  | 1,000 gsm | sq m      |
|                      | Dimpled Roll | 2.2m x 140m  | 1,000 gsm | sq m      |

## Pozibreak RB

Cusped / ribbed capillary break layer with combined root protection function.

| Pozibreak RB | Format       | Dimensions          | Priced in |
|--------------|--------------|---------------------|-----------|
|              | Dimpled Roll | 7mm x 2,200mm x 65m | sq m      |
