

Tree Root Protection

Product Information:

- Abweb TRP GW150/250 & GW200/300**

Used to protect tree roots from occasional trafficking during construction works. Prevents compaction of the ground restricting oxygen supply to the roots.

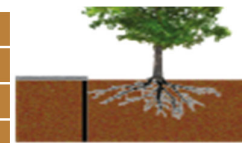

Abweb TRP GW150/250 & GW200 / 300	Format	Dimensions	Priced in
	Panels	4m x 6m	sq m

- Rootline GHDR Smooth**

Installed horizontally to protect the waterproof membrane from tree root damage on green roofs. It is used vertically around planters to stop tree roots growing out into footpaths and road pavements.

Rootline GHDR	Format	Dimensions	Weight	Priced in
	GHD85R	1.2m x 10m or 50m	850 gsm	sq m
	GHD120R	1.2m x 10m or 50m	1,200 gsm	sq m
	GHD200R	1.2m x 10m or 30m	2,000 gsm	sq m

- Rootline GHD100S3**

Cusped Rootline with ribbed profile, used vertically in planters or horizontally over contaminated / brownfield land.

Rootline GHD100S3	Format	Dimensions	Weight	Priced in
	Dimpled Roll	550mm x 120m	1,000 gsm	sq m
	Dimpled Roll	1.1m x 140m	1,000 gsm	sq m
	Dimpled Roll	2.2m x 140m	1,000 gsm	sq m

- Pozibreak RB**

Cusped / ribbed capillary break layer with combined root protection function.

Pozibreak RB	Format	Dimensions	Priced in
	Dimpled Roll	7mm x 2,200mm x 65m	sq m
